## PROFESSIONAL SUMMARY

**.NET Backend Engineer** with 3.5+ years delivering secure, scalable **enterprise systems** for **Etisalat UAE** across **telecom** and **fintech** domains. Specialized in **ASP.NET Core**, **REST APIs**, **multi-tenant architecture**, and **JWT/OAuth2** security. Built **50+ APIs**, resolved **50+ critical production issues**, and improved query performance by **45%**. Experienced in **AI-integrated backend systems** and cross-functional **Agile** delivery in **GCC/MENA** markets.

## TECHNICAL SKILLS

**Languages & Frameworks:** C#, .NET 6/7/8, ASP.NET Core, Core Java, Python

**Frontend:** Angular (Components, Services, Directives)

**Databases:** SQL Server, Oracle DB, EF Core, LINQ

**Cloud & Deployment:** Azure (Azure App Services), Azure Active Directory, CI/CD, GitHub, Bitbucket, IIS

**Security:** JWT, OAuth2, Role-Based Access Control (RBAC)

**Architecture:** Multi-Tenant Systems, REST APIs, Microservices

**Developer Tools:** GitHub Copilot, Claude Code, Visual Studio, VS Code, Postman

**Tools & Practices:** Agile/Scrum, JIRA, SOLID Principles, Design Patterns, REST API Testing, Swagger/OpenAPI

## EXPERIENCE

### Software Engineer

*Efforts Solutions – UAE*

**Nov 2023 – Present**

*Client: Etisalat*

- Architected and delivered **telecom-grade backend services** using **ASP.NET Core**, **SQL Server**, and **Angular**. Built **50+ RESTful APIs**
- Led **40+ code reviews** enforcing clean architecture, security standards, and coding best practices
- Worked in **Agile/Scrum teams** across **8+ sprints**, participating in sprint planning, daily stand-ups, reviews, and retrospectives
- Optimized **20+ database queries**, reducing load times by **45%** and improving system scalability under high traffic
- Implemented **database indexing strategies**, improving query execution speed by **60%** for high-frequency read operations
- Lead **debugging** efforts, resolving **50+ critical production issues** and ensuring system stability
- Delivered features end-to-end with **95%+ test coverage** across multiple **Agile** sprints in a cross-functional team of **12+ members**

### Software Engineer

*Bucca Tech*

**Apr 2023 – Nov 2023**

*Chennai, IN*

- Built and maintained **15+ SQL databases** and **50+ queries** using **SQL Server**
- Conducted **20+ code reviews** to maintain SQL coding standards and data integrity
- Established a simple **Android application** in **Android Studio** for fleet management serving **100+ users**
- Participated in **database design** and streamlined **30+ queries**, improving data retrieval speed by **40%**

### Software Developer

*Uniq Technologies*

**Sept 2022 – Apr 2023**

*Chennai, IN*

- Generated training curriculum, courses, and learning materials for software development topics, with a focus on **Python** programming languages
- Kept curriculum updated with the latest industry trends, technologies, and best practices, specifically in **Python** development

### Internship

*Shiash Info Solutions Pvt. Ltd.*

**Jun 2022 – Aug 2022**

*Chennai, IN*

- Completed **5+ Python projects** showcasing proficiency in the language
- Acquired practical knowledge of **Agile/Scrum** practices across **6+ sprints**

## EDUCATION

---

**PIT (Anna University)**

*B.Tech in Information Technology – CGPA: 8.14/10*

**Aug 2018 – Jul 2022**

*Chennai, IN*

## CERTIFICATES

---

[View Certificates](#)

## PERSONAL PROJECTS

---

### **AI-Enabled Multi-Tenant Task Management System** | [Documentation](#) | [GitHub](#)

- Engineered a secure **multi-tenant** task management application using **ASP.NET Core**, ensuring each tenant's data is safely isolated
- Integrated an **AI chatbot** that allows users to manage and query their **tasks in natural language**, fully tenant-aware
- Deployed secure **login and access control** using **JWT**, **OAuth2**, and **ASP.NET Core Identity**, including refresh tokens
- Established a **role-based access system** (Admin/User) to manage user permissions and visibility
- Followed **clean code practices** and a layered architecture (Controller, Service, Repository) for maintainability
- Added **filtering**, **sorting**, and **pagination** to enhance data handling
- Used **structured logs** with request IDs for easy tracking and debugging of API and AI requests
- Implemented a **GitHub Actions CI/CD pipeline** that automatically builds and deploys the ASP.NET Core API to **Azure Web App** on every push to master — 127+ successful runs
- Configured production deployment on **IIS**, managing app pools, environment variables, and production settings
- Used **AI developer tools** (Aider, Claude Code) to accelerate development, refactor code, and improve readability
- **Tech Stack**: C#, ASP.NET Core, Entity Framework Core, SQL Server, GitHub Actions, Azure Web App

### **AI Multi-Agent Enterprise Automation Platform** | [GitHub](#)

- Architected and built a modular **multi-agent AI platform** where specialized autonomous agents collaborate to analyze requirements, plan workflows, execute tasks, and validate outputs
- Delivered **Coordinator agent** to orchestrate tasks, **Planner agent** for workflow breakdown, **Executor agents** for data processing and document generation, and **Validator agent** for output verification
- Created **context-aware memory store** for conversation history and **tenant-aware agent isolation** for secure enterprise use cases with role-based access control
- **Tech Stack**: Python, Google API, ADK, LangChain, Supabase, AI/ML

## PROJECTS

---

### **Web Based Reporting Reconciliation System (WRRS)**

- As part of a financial application **modernization** initiative, contributed to the redesign of WRRS—an internal banking system used for **transaction reconciliation** and **regulatory reporting**
- The project involved migrating the legacy system to a **modern architecture** using **Angular** for the frontend and **.NET Core** for the backend, with a focus on improving **performance**, user experience, and long-term maintainability
- **Tools Used**: Angular, .NET Core, SQL Server, Microservices, APIs, OOPS, SDLC

### **Procurement Platform - Vendor Onboarding & Admin Configuration**

- Developed **vendor onboarding module** with registration, bank account CRUD, and approval workflows
- Built **admin configuration system** for product categories, notification templates, and 2FA management
- **Tools Used**: Spring Boot, Angular, Oracle DB, REST APIs, Microservices

### **Aani Portal**

- Integrated external **EPG API** to facilitate refund requests, track refund status, and ensure reliable settlement updates
- **Tools Used**: Spring Boot, Angular, Oracle DB, Microservices, APIs

### **Merchant Integration System (MIS)**

- As a **Backend Developer**, contributed to the MIS project by focusing on the development and support of **backend services** for the merchant integration, certification, and onboarding processes
- **Tools Used**: Spring Boot, Angular, Oracle DB, Microservices, APIs
